		  Analytics Cloud
		  Commerce
		  Mobile

LIFERAY.

What You'll Learn

Liferay Fundamentals is the definitive introduction to Liferay DXP, framing the Liferay Platform as a means of implementing your own vision for a complete digital experience.

Newly structured like a workshop, this course includes both demo and freeform exercises for a dynamic learning environment.

You'll begin the course by getting a rundown of Liferay's foundational concepts: learning how to integrate your existing users into Liferay, the best ways to organize users with two different strategies, and how to control user access to resources.

The latter half of Liferay Fundamentals prepares you for content and site management as well as how to publish efficiently, highlighting new features that make on-the-page editing easy.

The course ends with a review of new tools Analytics Cloud, Commerce, and Mobile that complete the digital experience.

LIFERAY

Liferay makes software that helps companies create digital experiences on web, mobile and connected devices. Our platform is open source, which makes it more reliable, innovative and secure. We try to leave a positive mark on the world through business and technology. Companies such as Adidas, Carrefour, Cisco Systems, Danone, Fujitsu, Lufthansa Flight Training, Siemens, Société Générale and the United Nations use Liferay. Visit us at www.liferay.com.
