

Liferay Go Live Review Program

A PROVEN LAUNCH PLAN

The Liferay Go Live Program engages your team during the critical stage just before launch. Our Global Services team works alongside you to identify and address performance issues that will determine the success of your Digital Experience Platform implementation.

A consultant from Liferay will help your project team deliver a prescriptive roadmap to improve your performance and stability, refine your test scenarios and baseline your performance metrics. Launch your project with frictionless deployment and ensure that you can bring back your instance in hours, not days. Rest secure with the knowledge that it's going to remain stable during the next few weeks, when you will see your heaviest load.

Liferay provides full implementation services under a separate program. For additional details, please contact your account manager.

What are the benefits?	How do we do it?	What will you get?
<ul style="list-style-type: none"> • Performance • Stability • Higher success with deployment • Reduction in initial post-launch issues • Stay on schedule and meet Go Live date 	<ul style="list-style-type: none"> • Specialized performance tuning resources • Identification of performance bottlenecks in the JVM, DB, and code • Test tool setup and execution 	<ul style="list-style-type: none"> • A roadmap for remediation and recommendations • Refined and reusable test cases • Increased performance and long term stability

PERFORMANCE AND STABILITY

A successful deployment is not just the first few days after a project goes live. Projects need a stable environment that continues to perform for months. The Liferay Go Live Program helps our customers accomplish this without the heavy lifting and high stress, allowing for a faster time to market with higher performance levels from the start.
