

Liferay Enterprise Subscription

Get help delivering, managing, and supporting your digital solutions with an enterprise subscription for Liferay DXP.

With a subscription for Liferay DXP along with additional services from Liferay and our partners, you gain exclusive access to enterprise-grade software and a team of experts that know Liferay technology the best. Choose to deploy the platform on premise, in your own cloud, or through our cloud with Liferay PaaS and Liferay SaaS.

Lower Your Total Cost of Ownership

Build your digital solutions more efficiently, reduce overall implementation costs, and minimize future technical debt with an enterprise subscription.

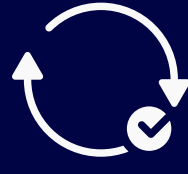

Proactive Support

Gain exclusive access to Liferay’s own support team, product experts, and validated partners to design your solutions effectively and achieve business value faster.

Reduced Responsibilities

Offload routine tasks to Liferay through a cloud subscription option. With Liferay PaaS, you can entrust infrastructure management to the Liferay team, and with Liferay SaaS, you can offload the management, hosting, and scaling of your application.

New Features and Updates

To ensure your business-critical solutions continue without interruption, Liferay will provide patches that can be directly applied to your Liferay instance along with new features, security patches, and bug fixes on a quarterly basis.

Access to the Liferay Partner Network

Work with certified Liferay partners to implement and support Liferay solutions for your industry or region. Our partners have a direct line to Liferay product leadership, opening up a channel for feedback and collaboration.

Best Practices and Trainings

Start seeing business value sooner through our entire library of Help Center articles and Private Classroom trainings led by seasoned Liferay experts.

Protect Your Solutions

Keep your mission-critical solutions running with enterprise-grade security and legal assurance.

Enterprise-Grade Security

Liferay will protect the platform by monitoring for security vulnerabilities and implementing fixes for the software. Customers on our SaaS subscription option will get these security patches and fixes applied for their instance directly by the Liferay team.

Legal Protection

Our Legal Assurance Program is not geographically limited and covers a broad range of intellectual property claims, including copyrights, trademarks, and patents.

Take Advantage of Platform-Exclusive Features

Leverage out-of-the-box capabilities and features that are exclusive to Liferay DXP, including security tools, enterprise search, and additional personalization, commerce, and analytics features. New features and upgrades are added regularly so that you can continually innovate and improve your solutions.

Ensure Business Continuity

Make sure your solution stays up and running smoothly. With Liferay PaaS or Liferay SaaS, you can entrust the uptime of your infrastructure and application to the Liferay team.

Turn your projects into success stories. Over 1,200 companies use Liferay to build, support, and launch the solutions that run their business.
