

# Liferay Enterprise Subscription

## Increased security for your mission critical projects

The transparency of open source and the security of a manufacturer-maintained product do not have to be mutually exclusive! With Liferay Enterprise Subscription, your application becomes enterprise-ready. Learn how our services create added value and a competitive advantage for your projects.

## Support Services

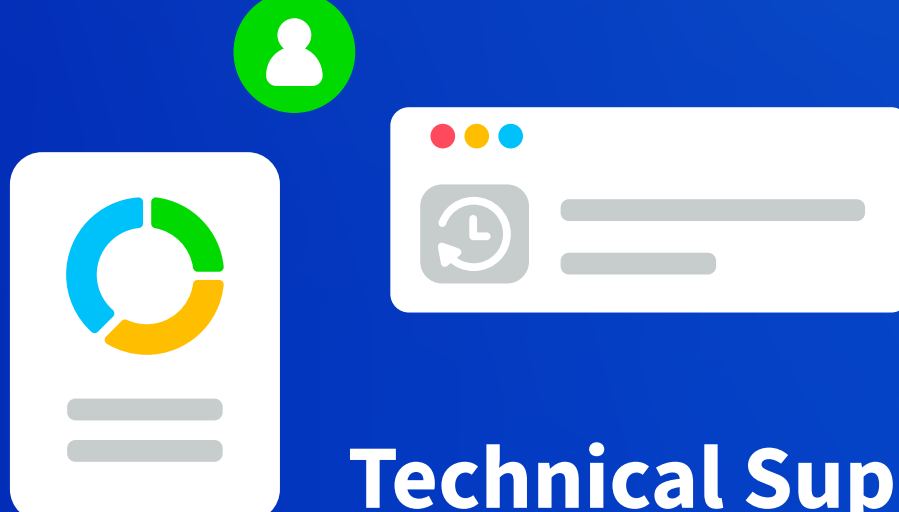

### Software Updates and Security Fixes:

Liferay Enterprise Subscription offers enhanced security through periodic bundle releases including the latest security patches and fixes.

### Customer Portal:

Liferay Enterprise Subscription includes exclusive access to the Liferay Customer Portal, which provides the latest product downloads, official documentation, software updates and other valuable resources for your Liferay projects.

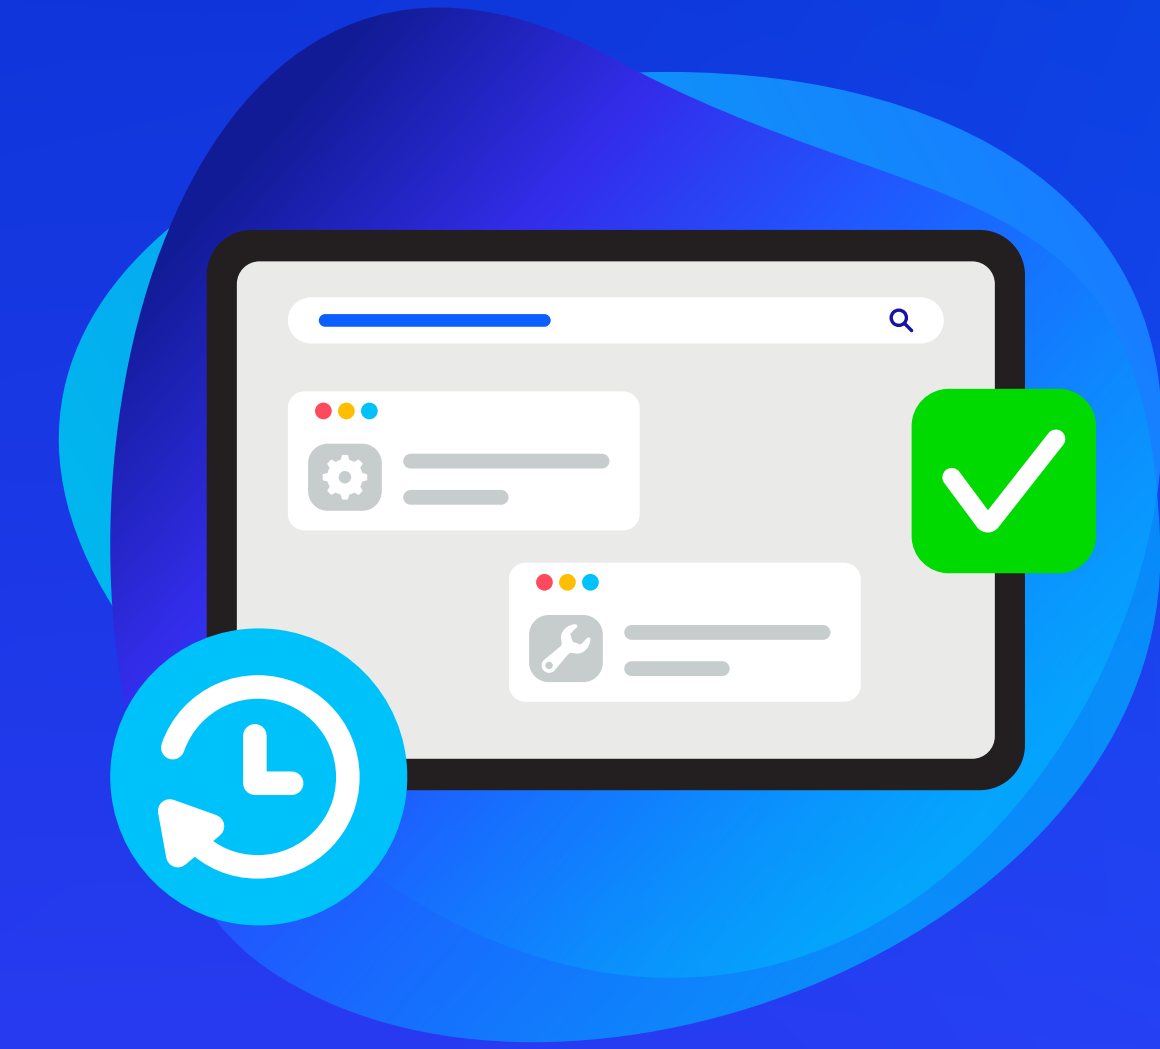

### Technical Support:

Thanks to extensive quality testing our support team ensures that potential problems are identified and resolved at an early stage. If your project environment requires additional support, our Global Services team is available to help you with migration, implementation, and managed services.

## Additional Features

### SSO & Multi-Factor Authentication:

Manage the access to your portal by having your administrators use our standardized authentication features.

### Analytics and Tracking:

Get a complete picture of your user interactions as well as the performance of your content and start optimizing by using A/B testing and personalized content.

### Metrics and Graphical Designer for Workflows:

Create workflows with drag & drop, define SLAs for your workflows, view the status of open tasks within the workflow process in real-time and measure performance.

### Standard Integrators:

Liferay DXP provides out-of-the-box connectors to a large number of common applications and databases such as Oracle, SQLServer, DB2, MySQL, Talend, SharePoint, Office 365 and many more.

### Commerce Capabilities:

Provide personalized product recommendations and offer exploding diagrams to help your customers understand complex products better and find spare parts faster. Support your sales team with intelligent order forecasts and account health alerts.

**For a complete overview of the additional functionalities and features of Liferay DXP contact us at [liferay.com/contact-sales](https://liferay.com/contact-sales).**

## The Complete Platform for Tailored Solutions

### Enterprise-Grade Code and Security:

Liferay DXP Enterprise Edition guarantees the security and stability required for mission critical projects. Extensive test cycles, certifications and other security measures ensure that risks are minimized from the outset.

### Legal Protection:

Our legal program protects our customers and ensures the business continuity of their Liferay projects.

### Perpetual License:

Enterprise customers are given a perpetual commercial license for on-premise products which means that in case a subscription is terminated, customers can continue running their Liferay projects without interruption – but without support, maintenance and additional services.

**Turn your mission critical projects into a success. Over 1,200 companies already rely on Liferay.**
