

# Liferay Experience Cloud

Liferay's flexible DXP-as-a-Service offering allows you to create, launch, and optimize digital solutions with the agility and convenience of SaaS.

## Key Capabilities

### SAVE TIME AND RESOURCES

Let your team focus on delivering strategic initiatives since Liferay will manage and maintain the infrastructure and the Liferay DXP application.

### EXTEND THE PLATFORM

Developers can use whatever programming language they prefer to extend the Liferay platform, without changing the core

### LAUNCH ON A SOLID INFRASTRUCTURE

Our cloud infrastructure is built on world-class technologies, like GCP POP Network and Kubernetes, to ensure business continuity and excellent performance.

### DECREASE TOTAL COST OF OWNERSHIP

Reduce costs in the long-run since Liferay will handle maintenance, upgrades, and updates for the DXP application.

Periodic SAST Tool Maintenance & Execution

Production Release Management Support & Troubleshooting

## Managed Platform

- Have the freedom to tailor and develop solutions while relying on the Liferay team to manage, maintain, and update the DXP application and Liferay infrastructure.
- Access the entire Liferay suite, including commerce and analytics features, natively.
- Leverage weekly new features, updates, and fixes.
- Depend on a platform that will autoscale to meet demand.

## Client Extensions

- Use Client Extensions to customize Liferay solutions without directly modifying the Liferay platform.
- Develop using whatever programming language you prefer.
- Tailor the solutions you need without compromising upgrades and maintainability.

[Learn more about Client Extensions here.](#)

## Cloud Platform and Services Optimized for Liferay DXP

- Depend on top-tier DDoS protection and WAF capabilities included with the offering.
- Updated to the latest version of Liferay DXP by default.
