What is an app?

An app is an ***atomic***, specialized component developed using Liferay or other technology that helps a customer to accomplish a specific task.

Examples: Data Connector, Custom Objects, Remote Apps, Design Packs, Fragments, Custom tools, Integrations.

It boxes anything custom in a verified, reproducible, sellable and deployable standard.

(re)taining dxp apps

improving & supporting

MATTHEW HARTEL

(re) taining DXP apps

- Existing DXP apps are still supported.
- New DXP apps are allowed, but must support 7.4
- When MP 1.0 is shutdown, all will be imported and still visible in the Marketplace. Only the latest version of the app will be migrated.
- All free apps (including Liferay Subscription Apps) will be available to everyone with a no cost download of the LPKG file.
- All paid apps will not be purchasable. As we invite you to your account, you can decide to make them purchasable using the new app flow.
