Liferay DXP Admin Experience Accessibility Conformance Report International Edition

(Based on VPAT® Version 2.5Rev)

Name of Product/Version: DXP 2025.Q4.0 Quarterly Release
Report Date: November 29, 2025
Product Description: One platform to solve the complex needs of your organization and provide exceptional user experiences at every touchpoint.
Contact Information: product@liferay.com
Notes: At Liferay, we believe an accessible product is a better product, which is why we've made accessibility a strategic priority.

We are committed to making Liferay an inclusive, accessible product that leaves nobody out.

Our goals:

- Make accessibility part of the Product Delivery priorities and culture.
- Generate accessible features by design.
- Give leads, prospects, and customers confidence in Liferay's accessibility capabilities and commitment from the beginning.
- Get WCAG / ADA certified.

"Voluntary Product Accessibility Template" and "VPAT" are registered service marks of the Information Technology Industry Council (ITI)

We will achieve these goals with the following strategy:

- **Clear Ownership and Governance:** The Platform Experience Team owns Liferay's accessibility initiative and must establish guidelines and governance to deliver an accessible product.
- **Accessible Design System:** We are evolving Lexicon, our Design System, to be accessible out-of-the-box.
- **Accessible by Design:** We are investing accessibility by procuring accessibility training for our designers and developers. In turn we are providing internal guidelines to all Liferay teams to better comply with WCAG/ADA rules, and incorporating accessibility rules into our code review tooling.
- **Accessibility Testing by Default:** We make sure new features are accessible before they reach the product, by including accessibility tests in our standard QA tests for all delivery teams. These tests are based on the reference tools AXE and JAWS.

- **Collaboration:** We proactively collaborate with some of the top accessibility companies in the USA and Europe to perform audits on our product and improve continuously.

The entire company is executing this strategy and making Liferay a better product for everybody.

Evaluation Methods Used:

Conformance to the listed accessibility standards has been evaluated by Liferay experts in accessibility using a combination of automated analysis tools and manual testing by keyboard and assistive technologies (screen readers, screen magnifiers, contrast checkers, chromatic vision simulators, etc.). The tests have been applied to a significant and representative number of product pages.
